‘The Future of Artificial Intelligence (AI)’

Promise & Reality

March 2019

Yew Soon, ONG

Professor of Computer Science and Engineering
Director, Data Science and AI Research Center
Nanyang Technological University, Singapore

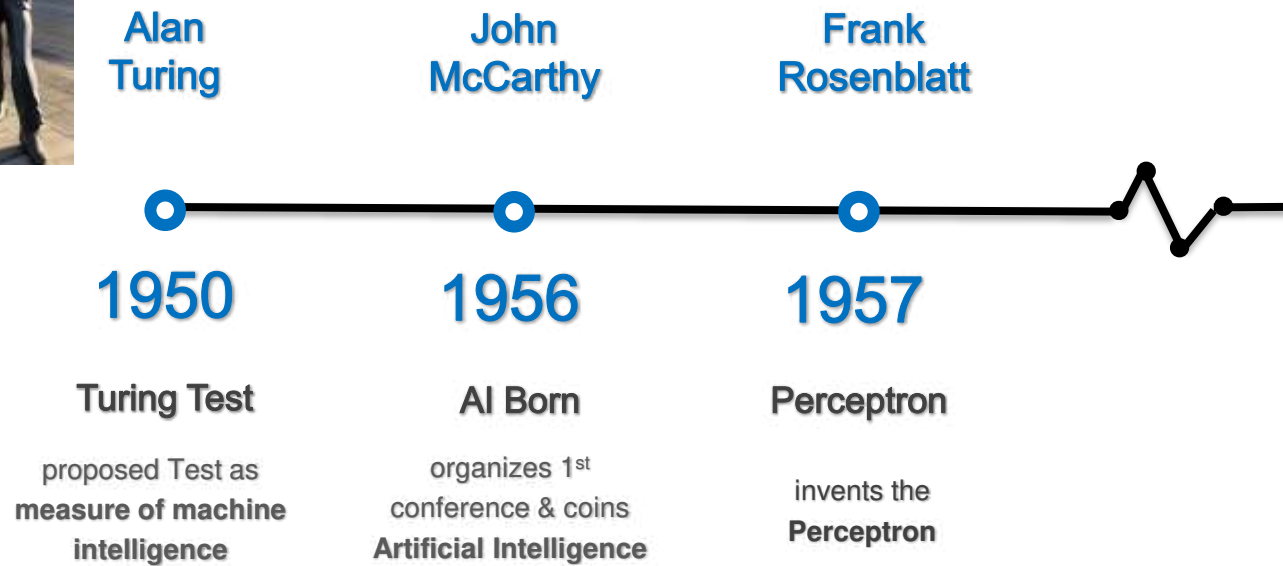

ROADMAP

1. AI past
2. AI future
3. AI Now, Reality & Promises
4. Opportunities, Pitfalls & Challenges
5. Core Pillars to Sustainable Artificial Intelligence

AI past

Artificial Intelligence Evolution

"within ten years a digital computer will be the world's chess champion," and, "within ten years a digital computer will discover and prove an important new mathematical theorem."

Herb Simon

American Economist and Political Scientist

Allen Newell, 1958

American Computer Scientist

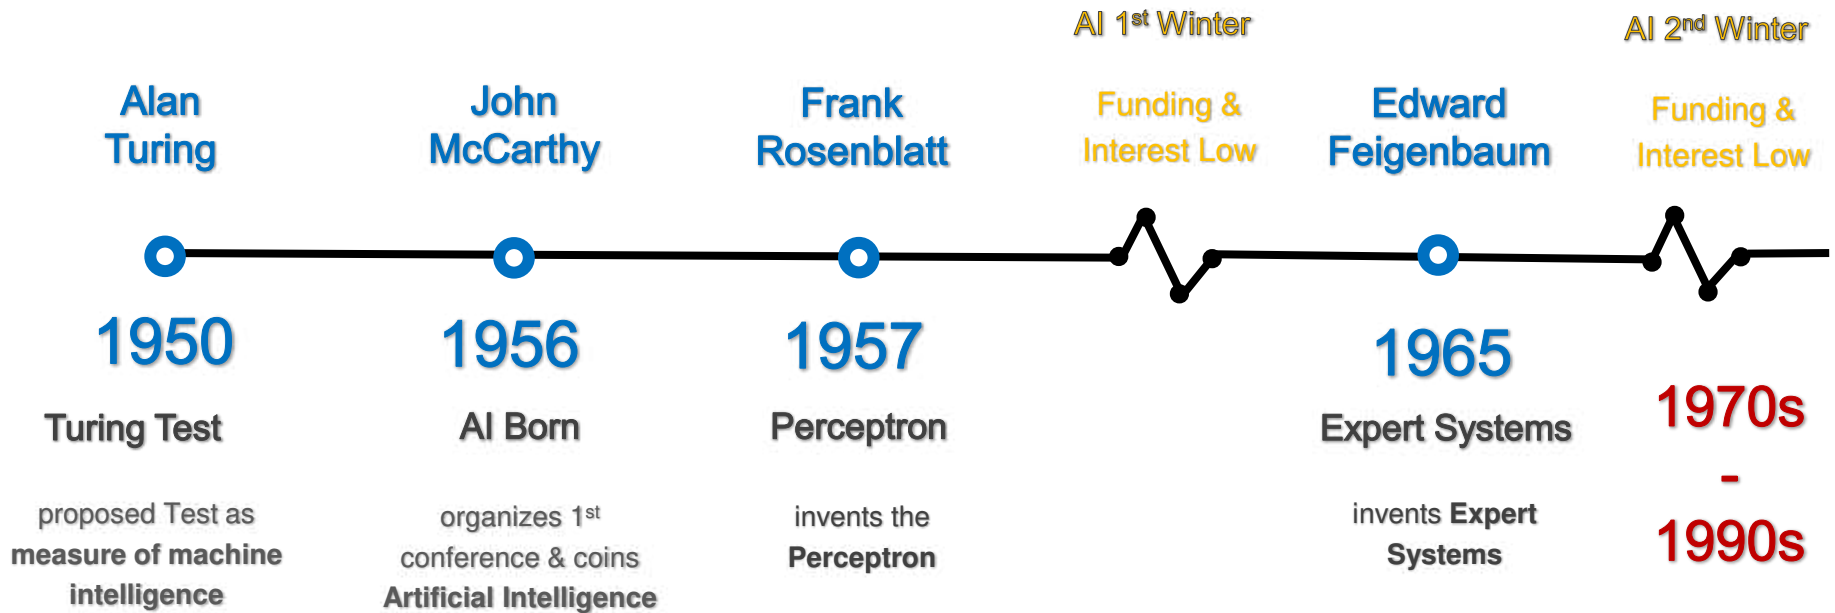

“Within our lifetime machines may surpass us in general intelligence”

“Within a generation, I am convinced, few compartments of intellect will remain outside the machine's realm – the problem of creating ‘artificial intelligence’ will be substantially solved”

Marvin Minsky, 1960s

American Cognitive Scientist

Artificial Intelligence Evolution

Artificial Intelligence Evolution

Deep Blue

Personal Assistants & Autonomous Devices

Alpha-GO

AI future?

1997

2011-

2015

IBM's Deep Blue beats world champion in chess

Virtual personal assistants like SIRI, Cortana, Watson & Eugene

Google DeepMind's AlphaGo beats world champions in Go!

Many spectacular predictions of the
AI future...

“Artificial intelligence will reach human levels by around 2029.”

Ray Kurzweil, 2014

Inventor and Futurist

“Computers will overtake humans with AI within the next 100 years.”

Stephen Hawking, 2015

Theoretical Physicist and Cosmologist

“Probably closer to 2030 to 2040 imo. 2060 would be a linear extrapolation, but progress is exponential.”

Elon Musks' Twitter, 2017
CEO, SpaceX

How about those Experts that
'*makes/creates*' Artificial Intelligence,
what would they say?

Question: "When will AI Exceed Human Performance?"

WHEN WILL AI EXCEED HUMAN PERFORMANCE?

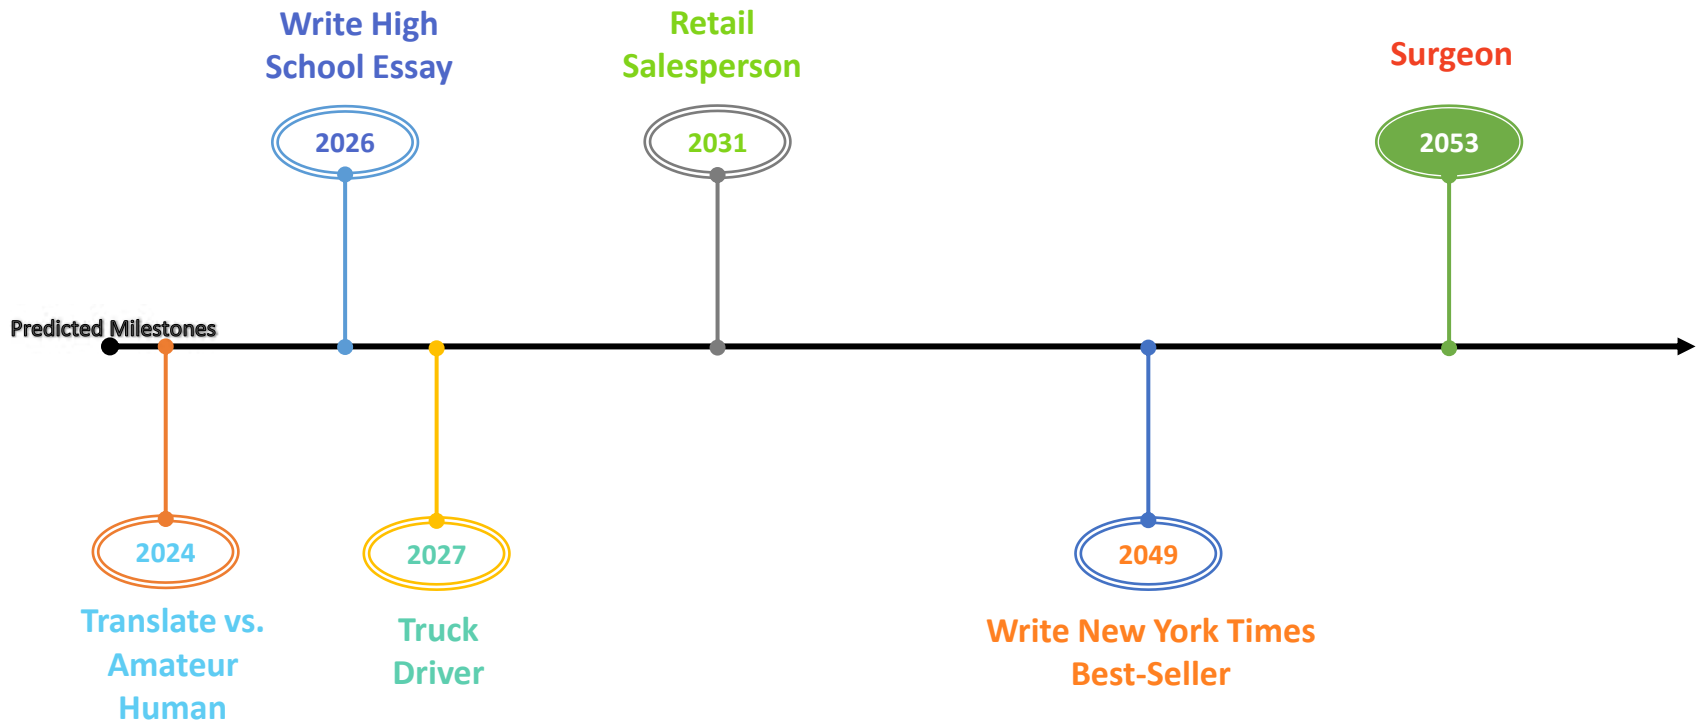

AI outperforming humans in all tasks in **45 years**

AI automating all human jobs in **120 years**

Evidence By 252 AI experts
(people who *makes* AI), 2016

Statistics from Publication: "When Will AI Exceed Human Performance? Evidence from AI Experts"

AI WILL EXCEED HUMAN PERFORMANCE AT...

Statistics from "When Will AI Exceed Human Performance? Evidence from AI Experts"

**Seen the
past...**

**Heard the
future...**

Where do we go from here?

**“Learn from the past, Prepare for the future,
Live in the present”**

Thomas S. Monson

AI now

What's Reality...

“Machines are excellent & reliable in numbers.”

*“27834729847.333
x
847389875497 = ?”*

“Can Machines look at you & understand your emotional state?”

“AI has by now succeeded in doing essentially everything that requires ‘thinking’ but has failed to do most of what people and animals do ‘without thinking’

Donald Knuth, 2009

American computer scientist

Basic Human Senses
&
Beyond

The Reality...

*"Machines are
endowed with
Super AI Sensing
& Understanding
Capabilities."*

AI now

**‘UNDERSTAND’
&
‘SMART DECISIONS’**

**SENSES GOING BEYOND
HUMAN SPECTRUM**

SIGHT

SPEECH

HEARING

SMELL ...

**GOES
BEYOND
BIOLOGICAL
SPECTRUM...**

Augmented Intelligence

**GOES
BEYOND
TRADITIONAL
OBJECT...**

The Promises...

AI Opportunities...

AI Low-hanging fruits

Early Artificial Intelligence Activities @ NTU

**Crowd AI IP
created in 2008**

“... funded by the National Research Fund, launched **Dark Dot on Apple iTunes app store in October 2011. Shortly after its launch, it became the top action game in 48 countries, including United States, China and Singapore** and beat popular apps and games such as Facebook, What’s App, Angry Birds and Bejeweled! With a **download of well over 448,000 players worldwide**, with 27% of its players from China and 17% from the USA.” – 2011

“DarkDot”

Inzen Studio Pte. Ltd. Startup that raises **\$717,288**
Acquisition by iCandy Interactive Limited for **\$4.4m**

AI Pitfalls & Challenges

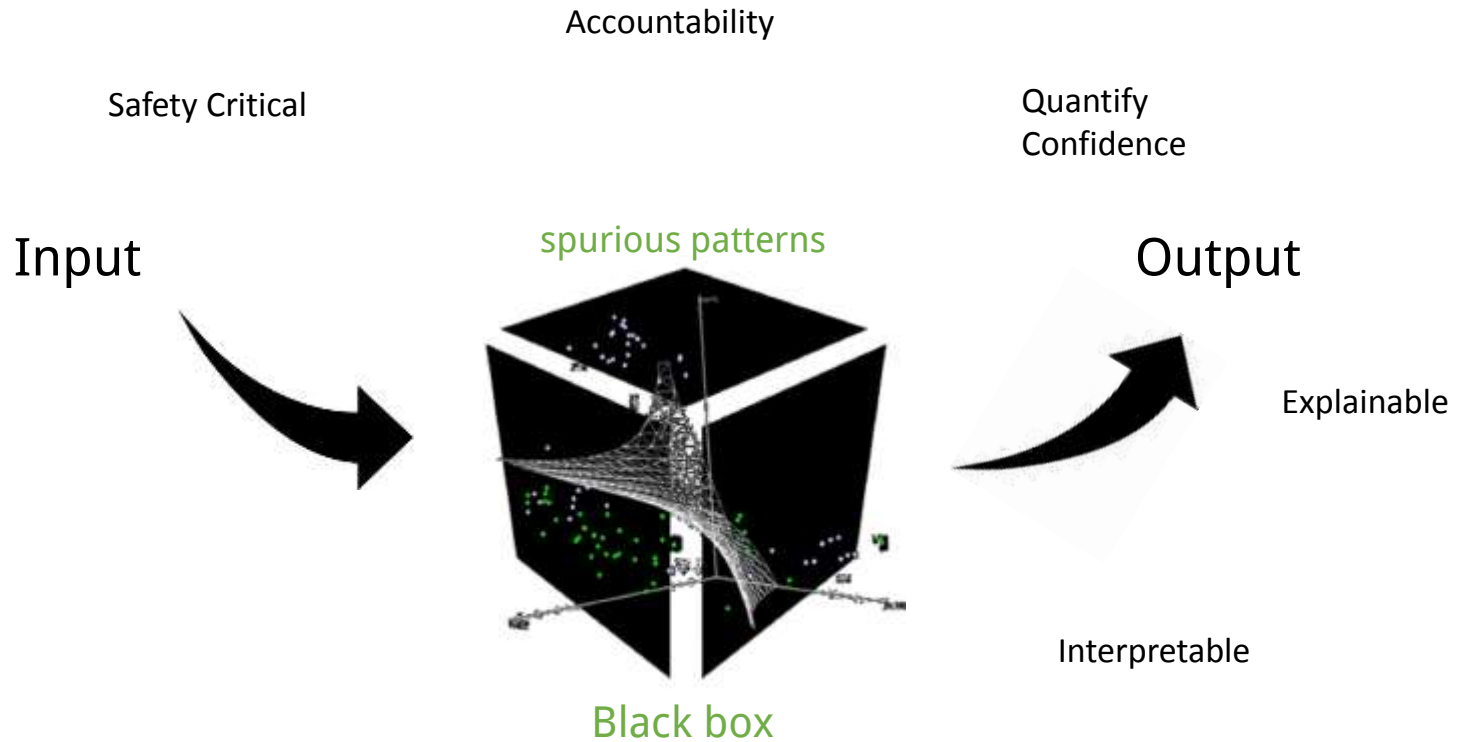

Sustainable Artificial Intelligence...

Artificial Intelligence R₅

AIR₅

5 Core Pillars to address Pitfalls for Sustainable Artificial Life

Rationalizability

Vulnerable

malicious data

adversarial attacks

Resilience

Low Replications of
AI Promises

Formal Testing
& Verifications

AI Standards

AI Trustworthiness

Reproducibility

Specialized
AIs

Artificial
General Intelli

Building ethics into AI

Privacy
